AI CONSULTING

Smarter business. Faster results.

AI Faster Than You Think

Reza Katanchi — Personal Brand Guide v1.1

PERSONAL STORY

Why Reza Katanchi?

A computer network specialist who saw AI could become the growth infrastructure for every small business — and decided to build that bridge. The combination of deep technical knowledge with a simple, friendly communication style is something very few people have.

BRAND STRATEGY

Mission

Speed up business with AI

From sales to product building, in the shortest time possible

Vision

AI for everyone, not just the big players

"Every small business deserves the AI tools of a large corporation"

Brand Positioning

"The only AI consultant where you see results on day one — with up to 3 months of support"

CORE VALUES · FIRST CODE AI CONSULTING

Trust First

Client trust matters more than short-term revenue.

We keep client data confidential · We never make promises we can't keep · If AI isn't the right fit, we say so honestly

Practical AI

We focus on real business results, not just technology.

We test new AI tools · Solutions that increase revenue or cut costs · We keep our knowledge up to date

Simplicity

We make complex technology simple and understandable.

No unnecessary jargon · We prefer simpler solutions · Costs and limitations explained upfront

Client Success

Your success is our success.

We see results together · Up to 3 months of support · You're never left alone

UNIQUE SELLING POINTS (USP)

We integrate AI into your business in a single working day

AI consulting + 3 months of support — not just training, but full execution

From CRM to website, with AI in one day — backed by real ongoing support

ELEVATOR PITCH — 30 SECONDS

"I'm Reza Katanchi, an AI consultant. I come from the world of computer networking, and now I help small businesses — from restaurants to agencies — sell faster and work smarter with AI. From CRM to personal assistants and websites, we get everything running in one day — and stay by your side for up to 3 months."

TARGET AUDIENCE

- Restaurants
- Agencies
- Retail Shops
- Independent Consultants
- Small Businesses
- All ages & industries

Buyer Persona — Core Pain Point

Small business owner · Limited time, growing competition · Knows AI matters but doesn't know where to start ·
Core concern: fast results without complexity

CORE SERVICES

Needs Assessment
Precise diagnosis before any action

Personal AI Assistant
Custom AI built for your business

Same-Day Execution
CRM · Website · Product

Ongoing Support
1–3 months · Prompt writing

Brand Voice

Friendly-Professional — like an experienced friend who is honest and delivers results

In emails: more formal · On Instagram: more casual · Always: direct and simple

✓ Introduce AI through outcomes

Say what AI does for the business, not what AI is

✓ Use numbers and timeframes

"In one day", "within 3 months" — concrete and believable

✓ Reduce the fear of AI

"No coding needed" — your audience thinks AI is complicated

✓ Use real examples

Restaurants, agencies, shops — the audience must see themselves in your story

✓ Highlight your support

"We won't leave you alone" — the biggest fear is being abandoned after purchase

✗ Don't start with technical definitions

Your audience doesn't know what LLM or Machine Learning means

✗ Don't make vague promises

"Your business will be transformed" without numbers builds no trust

✗ Don't make AI sound magical

"AI will solve all your problems" will destroy your credibility

✗ Don't only talk about technology

Your audience cares about more sales, not ChatGPT

✗ Don't attack competitors

Instead of "others only teach", say "we also execute"

Before & After Examples ↗

✗ Don't say

"By leveraging large language models and intelligent automation, your business processes will be optimized"

✓ Say

"With AI, you'll respond to customers 10x faster — without being glued to your phone"

✗ Don't say

"Artificial intelligence can unlock the latent potential of your business operations"

✓ Say

"A restaurant we worked with saw 40% more online orders — in just 3 days"

✗ Don't say

"We provide comprehensive digital transformation solutions with an AI-First approach"

✓ Say

"We build an AI assistant that messages your customers, quotes prices, and follows up — all without you lifting a finger"
